**DETAILED ACTION**

\*\*\* This office action is in response to Applicant's Amendment and RCE filed September 02, 2008. Claims 1-2,4-17,34-35 are pending. Claims 3,18-33 were canceled.

*Allowable Subject Matter*

1. Claims 1-2,4-17,34-35 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:  
Applicant's amendment filed September 02, 2008 and convincing remarks of record have overcome the rejections in the last office action. The references of record including Kawaguchi et al (The article title "The formation of crystalline defects and crystal growth mechanism in  $\text{In}_x\text{Ga}_{1-x}\text{N}/\text{GaN}$  heterostructure grown by metalorganic vapor phase epitaxy", 1998, pp 24-26), Watanabe et al (6,555,846), Chen (Article title of "Pit formation in  $\text{GaInN}$  quantum wells", 1998), etc., do not fairly anticipatively disclose each and every aspect of the claimed method for fabricating a light emitting device, or fairly make a prima facie obvious case of the claimed method, such as in base claim 1, the inclusion of forming at least one compound semiconductor layer based on gallium nitride and being an active layer or a part of an active layer sequence, the at least one compound semiconductor layer being a light-emitting layer; and setting growth parameters used during production of the compound semiconductor layer such that, at least in some cases in a vicinity of dislocations in the compound semiconductor layer, regions are produced in the compound semiconductor layer having a lower thickness than remaining regions of the compound semiconductor layer; wherein said regions with the lower thickness are formed to be less than half as thick as the remaining regions of the compound semiconductor layer in the final structure of the light- emitting device; and wherein the light-emitting device is Indium free, and the light-emitting layer comprises  $\text{Al}_y\text{Ga}_{1-y}\text{N}$ , where  $0 < y \leq 1$ .
